Tahap-tahap dalam melakukan dekripsi

Langkah pertama adalah mencari frekuensi kemunculan dari tiap huruf pada dokumen.
Hasil:

A	3
B	146
C	211
D	9
E	15
F	51
G	25
H	153
I	58
J	166
K	91
L	50
M	76
N	196
O	57
P	184
Q	52
R	27
S	99
T	30
U	172
V	35
W	337
X	1
Y	83
Z	150

Kemudian analisis frekuensi pada data:

Huruf- huruf yang paling sering muncul pada teks berbahasa Inggris:
E, T, A, O, I, N, S, H, R, dan D

Huruf w paling banyak -> diduga e
Kemudian memasangkan w dengan n, h, c pada dokumen, untuk melihat kemunculan triplet mana yang paling sering (akan diasumsikan awal sebagai 'THE')
Didapat hasilnya adalah chw, maka diduga chw = THE

Kemudian diapat dilihat bahwa 10 frekuensi terbesar dalam dokumen:
W,C,N, P, U ,J, H, Z, B, S, K

Yang menurut dugaan akan bersesuaian dengan
E, T, A, O, I, N, S, H, R, D,

Karena chw = THE maka dugaan awalnya menjadi

Cipherteks	N	P	U	J	Z	B	S	K
Plainteks	A	O	I	N	S	R	D	?

Namun pada dokumen terdapat kalimat
puunnjpuonmbEpfHonmbinpsu,umfHpukzjyzjipvnjyEbkmsqpTE,uTpbTzjipumffEuukmsfnqlpjo,lpozjinkkonmbyEtTunbvHpTErEb,onmqziHTsnuEonmblpuuznj.onmynj'TjEEyTnvnbgunHpbyunonmbEspa.onmEalEbzEjfETHEupqElbntsEqpusnTTEbovzjjEbuvHnvpuTETHEzbqnjEo,vEpsTHoHEzbuvHnjErEbibnvmlpjytnbEyHnqEqpgEbuvHniETpyyzfTEyTnlbEufbzlTznjybmiu.

Jadi tidak mungkin N=A dan P = O dan U=I
Karena tidak ada rangkaian kata dimana ada 5 huruf vokal berdampingan

Kemudian terdapat kalimat:
"…,vHpTvnmsyonmbEfnqqEjy?"

Kata awal dalam kalimat Tanya biasanya:
What, who, where , why, how

Karena yang masih memenuhi:
What, who, why
Namun diduga p != Y karena frekuensi p yang begitu besar,
Jadi dugaan v=W
Dan p=A atau O

Jadi dilakukan subtitusi v=W

Dugaan sementara=>
N=A atau O
P=O atau A
U !=I => U=N
J=I
Z=S
B=R
S=D

Subtitusi N=A, P=O
Tidak dapat apa2
Subtitusi N=O, P=A

Terdapat kalimat “tmTTHEWATEbufsOuETO…”
Yang bisa dipecah sbb “tmT THE WATEbufsOuETO…”

Diduga-> b = R (sesuai Dugaan sekarang)
Subtitusi b=R

Terdapat kalimat THEkARTHERTHE
Dipecah THE kARTHER THE

Diduga k=F, subtitusi

THEeAlAjEuElREFERREyTHE
Dipecah: THE eAlAjEuEl **REFERREy** THE

Diduga -> REFERRED-> subtitusi y=D

Sekarang dilakukan analisis bahasa karena sudah ada beberapa kata yang jelas:
Terdapat kata:
WATER
FEED
REFERRED
THE
HOW
WHAT
FARTHER

Dan banyak kata “FzuH” dalam plain text, kami duga itu merupakan “FISH” karena berkaitan dengan kata2 yang sudah ada (namun belum diketahui kaitannya dengan pembunuhan yang menjadi tema)

Mulai dari sekarang, banyak kalimat2 yang dapat “terbaca” dan subtitusi dilakukan sesuai “keterbacaan” kalimat tersebut

HOWErER, - > HOWEVER?
DIFFEREjfE. -> DIFFERENCE.?
THEFROdENFISH -> THE FROZEN FISH?
TASTETHEDIFFERENCE**tETWEEN**FRESHANDFROZEN->BETWEEN?
ENVIRONqENT-> ENVIRONMENT?
IFoOmHAVEMET - > IF YOU HAVE MET?
YOUAREA**sIVE!** -> ALIVE!?
THE FROZEN FISH **BROUiHTALOWERIRICE** - > BROUGHT A LOWER PRICE?
THE**eAPANESE**HAVEALWAYSLOVED -> JAPANESE?
THEYDIDNOT **LIgE** FROZENFISH. -> LIKE?
YOU ARE **EaCITED** TO TRY NEW SOLUTIONS -> EXCITED?
CONxUERING -> CONQUERING?

Sekarang, semua huruf cipherteks sudah disubtitusi dengan plainteks.

Plainteks

A tale: put a shark in your tank

The Japanese have always loved fresh fish. But the waters close to Japan have not held many fish for decades. So to feed the Japanese population, fishing boats got bigger and went farther than ever. The farther the fishermen went, the longer it took to bring in the fish. if the return trip took more than a few days, the fish were not fresh. The Japanese did not like the taste. to solve this problem, fishing companies installed freezers on their boats. They would catch the fish and freeze them at sea. Freezers allowed the boats to go farther and stay longer. However, the Japanese could taste the difference between fresh and frozen and they did not like frozen fish.

The frozen fish brought a lower price. So fishing companies installed fish tanks. they would catch the fish and stuff them in the tanks, fin to fin. After a little thrashing around, the fish stopped moving. They were tired and dull, but alive. Unfortunately, the Japanese could still taste the difference.

Because the fish did not move for days, they lost their fresh-fish taste. The Japanese preferred the lively taste of fresh fish, not sluggish fish. So how did Japanese fishing companies solve this problem? How do they get fresh-tasting fish to Japan? If you were consulting the fish industry, what would you recommend?

As soon as you reach your goals, such as finding a wonderful mate, starting a successful company, paying off your debts or whatever, you might lose your passion. You don't need to work so hard so you relax. You experience the same problem as lottery winners who waste their money, wealthy heirs who never grow up and bored homemakers who get addicted to prescription drugs.

Like the Japanese fish problem, the best solution is simple. It was observed by L. Ron Hubbard in the early nineteen fifty's. "Man thrives, oddly enough, only in the presence of a challenging environment."-L. Ron Hubbard.

The benefits of a challenge:
The more intelligent, persistent and competent you are, the more you enjoy a good problem. If your challenges are the correct size, and if you are steadily conquering those challenges, you are happy. You think of your challenges and get energized .You are excited to try new solutions. You have fun. You are alive!

How Japanese fish stay fresh:
To keep the fish tasting fresh, the Japanese fishing companies still put the fish in the tanks. But now they add a small shark to each tank. The shark eats a few fish, but most of the fish arrive in a very lively state .the fish are challenged.

Recommendations:
Instead of avoiding challenges, jump into them. Beat the heck out of them. Enjoy the game. If your challenges are too large or too numerous, do not give up. Failing makes you tired. Instead, reorganize. Find more determination, more knowledge, more help.

If you have met your goals, set some bigger goals.
Once you meet your personal or family needs, Move on to goals for your group, the society, even mankind. Don't create success and lie in it. You have resources, skills and abilities to make a difference. So, put a shark in your tank and see how far you can really go!

Tahap-tahap dalam melakukan dekripsi

Pertama-tama kami mencari kriptogram yang paling sering berulang di dalam cipherteks. Kami menggunakan alat bantu applet cryptohelper untuk mempermudah dalam menemukan kriptogram ini. Pada tahap ini kami berhasil menemukan sebuah kriptogram yang paling sering berulang, yaitu:

VBP = 10 at positions 123,323,931,1027,1099,1155,1203,1587,1643,3339

Setelah itu kami mencari jarak antara kriptogram yang berulang.
Jarak antara VBP ke-1 dengan VBP ke-2 adalah 323-123 = 200
Jarak antara VBP ke-2 dengan VBP ke-3 adalah 931-323 = 608
Jarak antara VBP ke-3 dengan VBP ke-4 adalah 2335-2303 = 96
Jarak antara VBP ke-4 dengan VBP ke-5 adalah 2567-2335 = 72
Jarak antara VBP ke-5 dengan VBP ke-6 adalah 2639-2567 = 56
Jarak antara VBP ke-6 dengan VBP ke-7 adalah 2671-2639 = 48
Jarak antara VBP ke-7 dengan VBP ke-8 adalah 2951-2671 = 384
Jarak antara VBP ke-8 dengan VBP ke-9 adalah 3138-2951 = 56
Jarak antara VBP ke-9 dengan VBP ke-10 adalah 3143-3138 = 1696

Faktor pembagi 200 = {2, 4, 5, 8, 10, 25, 50, 100, 200}
Faktor pembagi 608 = {2, 4, 8, }
Faktor pembagi 96 = {2, 4, 6, 8, 12, }
Faktor pembagi 72 = {2, 4, 6, 8, 9, 12}
Faktor pembagi 56 = {2, 4, 7, 8, 14, 28, 56}
Faktor pembagi 48 = {2, 4, 6, 8, 12, 16, 24, 48}
Faktor pembagi 384 = {2, 4, 6, 8, }
Faktor pembagi 1696 = {2, 4, 8, }

Irisan dari keseluruhan ialah 2, 4, dan 8. Kemungkinan panjang kunci ialah 2, 4, ataupun 8. Kami berasumsi bahwa panjang kunci 2 tidak mungkin sehingga kami mencoba untuk panjang kunci 4 dan 8.

Untuk panjang kunci 4, kami menggunakan cryptohelper untuk memisahkan pesan pada kelipatan 4.

Kami mengumpamakan bahwa plainteks ialah huruf EEEE (huruf yang paling sering muncul di dalam Bahasa Inggris), untuk menemukan kuncinya kami menggunakan tabel Vigenere. Kunci yang ditemukan ialah: y l a z.
Kunci ini masih belum jelas ylaz → apakah plan? Setelah cipherteks didekripsi dengan kunci plan, kami tidak menemukan hasil yang bagus. Kesimpulan sementara, panjang kunci bukan 4, tetapi 8.
Ulangi lagi langkah awal, yaitu memisahkan cipherteks menjadi 8 kelompok pesan.

Kami mengumpamakan bahwa plainteks ialah huruf EEEEEEEE (huruf yang paling sering muncul di dalam Bahasa Inggris), untuk menemukan kuncinya kami menggunakan tabel Vigenere. Kunci yang ditemukan ialah: y l r c u l a r.
Kunci ini masih belum jelas ylrcular → apakah circular? Setelah cipherteks didekripsi dengan kunci circular, kami menemukan plainteks dalam Bahasa Inggris dan bisa terbaca dengan baik.

Plainteks

Suklu finds peace and serenity in nepal. Nepal is a far away country filled with magical and remarkable objects for balinese artist wayan sujana. For the thirty seven years old, nicknamed suklu, visiting this remarkable country was inspiring. I saw a very beautiful and heavenly scene when my plane began to land. It was such a thrilling moment for my mind and my soul, suklu said. The reflection of the sunshine on the snowy himalayan peaks was, for suklu, like a glittering diamond an aesthetic and spiritual experience. The sight was so stunning he could only think in time worn phrases: Is this the stairway to heaven? The experience has led to an exhibition of paintings from fifteenth of august through fifteenth of september at the komaneka fine art gallery in ubud. Suklu said his brief journey to nepal had enlightened him. He went there after attending the biennale xi art event in bangladesh. It was a short visit but it left me with so many memorable experiences with which to enhance my artistic creations, he said. Within three days of returning, suklu created about one hundred sketches about entirely new subjects. I finished all the work at home, he said. For him nepal and its people are still filled with mystery. Surrounded by mountain scapped with eternal snows, Nepal remains a heaven in its place on top of the world. Suklu said while the country was cold stiff and serene, it was filled with a secret aesthetic beauty. I was impressed by katmandu, nepal's capital. The city is home to numerous buddhist and hindu temples. I felt like i was at home in bali, he said. He felt happy and tranquil when visiting these places of worship, especially praying at buddhanikakanta. Suklu's enlightenment is clearly manifest in his latest work compared to his previous creations. It is obvious he has undergone a dramatic change. While his earlier work concentrated on the female form, his most recent is now animated with meditative and spiritual themes and objects. Depicting women Suklu admitted was not a burden. There were so many ideas going through my head when i wanted to create a work with a female theme, he said. Now however, he has to contemplate. It requires a lot more energy, patience, and perseverance, he said. Because his subject demanded no standard form or composition Suklu said he had think extremely hard to produce from his mind and his heart. For suklu, creating repetitive forms and colors was indulging himself. It was a kind of healing process, he said. His current works represent the transformation of his inner being. His worken titled jejak, or footprints, a two hundred cm by a hundred cm mixed media on canvas, is dominated with yellow and orange. The work is comforting, symbolizing the never ending journey to the state of moksha (liberation) and nirvana (heaven). It is also away to the moment of truth. Another work pinggir tebing (on the edge of the ravine) a mixed media on canvas shows two ravines facing each other. Yellowish rays shine between the two ravines as if promising hope and enlightenment. In memori januari (january memory) suklu presents a figurative pattern in the form of a box. He paints an obscure figure inside the box as if he hides a mystery. This painting has given me a sweet memory, suklu, winner of the philipmorris cp open biennale and the indofood art awards, said. Suklu also displays several attractive works entitled amanda i, amanda ii, and amanda iii featuring alamanda flowers. The title is wrong it is supposed to be alamanda not

amanda, he said. To accompany the exhibition suklu collaborated with artist nyoman sura, who created a special dance performed at and around the gallery. In his choreography sura tried to capture the feeling and the atmosphere of nepal, as experienced by suklu. Before performing, suklu painted suras body, treating it like a canvas. In the dance sura begins to walk the paths of the rice field near the gallery. His body sways beautifully on an open air stage as rays of sun silhouette him. As the sun sets in the west, sura wraps his body with along black cloth and begins to dance vigorously. I have dreamed of working together with sura for such a long time, suklu said. Suklu's work is that of personal change - an ongoing imaginative and creative process if as an artist suklu never finds his personal apex, he will continue to enjoy the search.
